Santa's Special Delivery

When Marathon took a call one week before Christmas about a very special Rayglass Legend that was to be ready for play on the big day, it was clear that all the elves would need to help and make this wish come true. RF Wyeth of Bucklands Beach had arranged to have a very fast 850 Legend, trimmed with two 275 hp Verados under the tree for all the family to enjoy as they gathered for the holiday. With the speed and looks this boat possesses, Bob wanted to keep her hull spotless and fast by eliminating anti-foul coatings – and also to forgo the long holiday queues and drama at the launch ramps in the area. A HydroHoist Boatlift was the perfect solution.

Come the 20th, a decision was made to proceed with the Christmas plan and by the close of business on the 23rd, Santa's new *sleigh* was on top a new HydroHoist 9000B at Bucklands Beach Yacht Club, for the Wyeth clan to enjoy. Auckland weather even cooperated to keep this beauty as dry on top as she was now on the bottom for a stretch during the holiday.

Special thanks to Santa's Helpers at Buckland Beach Yacht Club, Half Moon Bay Marina and CANDO Lifting, whose great service made this all possible.
